Spread the word!

If you like your new speakers and would like to help a small company that is trying really hard to run their business in a way that respects their users, please consider sharing your experience. Reviews on the site where you purchased the speakers are truly helpful to us and can be fun to write. Mentions on social media are a great way to spread the word, and many of our users have been excited to share their new system with their friends. Music has an incredible ability to help us bond!

Happy Listening!

Gary Gesellchen & Rick Kernan

VANATOO® TRANSPARENT ZERO PLUS™

Important Packaging Instructions

Packaging the speakers by the factory method is essential for protecting them should you ever need to send them in for service or (gasp!) a refund ...

- 1** Each speaker gets placed inside the original dual protective bags, the soft one on the inside against the speaker.
- 2** Place each speaker into the perfectly sized cavities in the bottom foam tray. Put the grills in their bags and insert in the slot in the bottom foam tray.
- 3** Place the upper foam accessories tray over the top of the speakers and grills, carefully working it down so that the grills fit into the slot in the upper foam tray.
- 4** Place all of the remaining accessories in the upper foam accessories tray. This should include the power supply and power cord, interconnect cable, USB cable, RCA to 3.5mm cable, 3.5mm to 3.5mm cable, remote control, 2.5mm Allen wrench, Vanatoo pads, Quick Start Guide, Safety Sheet, and this Thank You Sheet.
- 5** An overbox is recommended to protect the white Vanatoo box, which can get pretty dirty and beat-up in shipping. The white Vanatoo box is designed to survive shipping if no overbox is available. Please seal the top lid of the Vanatoo box with 3 shorter strips of tape as shown (dotted lines).

Thank you for taking the time to package the speakers well. Doing so protects them in shipment!
